Supervisor Roger Lewis
cc: Clerk Karla Ziezmer & Treasurer Lisa Ost
Dundee Township Hall
179 W Main St
Dundee, MI 48131

Dear Supervisor Lewis, Clerk Ziezmer, and Treasurer Ost,

I'm writing to express my strong opposition to the proposed data center proposal from Cloverleaf in Dundee Township. While economic growth is important, this project carries significant risks that outweigh its potential benefits. Data centers require large amounts of electricity and sometimes water, which puts a heavy strain on local utilities. In many communities where data centers have been built, residents have ended up with higher water and electric rates while large facilities receive discounted rates. We should not take on that risk.

These facilities also pose long-term environmental and quality-of-life impacts. The constant noise of cooling systems and generators, increased pollution, and the large construction footprint would permanently alter the character of nearby neighborhoods and undermine the rural environment that residents have been vocal about preserving.

While supporters have highlighted the economic impact these data centers can bring, the fact is that data centers create very few permanent jobs. They also typically seek tax abatements that reduce funding for schools and other essential community services.

For these reasons, I urge you to reject approval of the data center unless there is clear, independently verified evidence that it will not raise utility costs, harm the environment, or diminish residents' quality of life.

Thank you for your consideration.

Sincerely,

State Representative Reggie Miller

Good Morning Karla,

As we discussed during our conversation this morning, the 2 unpaid drive tiles will be applied to the attached contract. The cost of the work performed came in under the estimated amount of the contract, and there is enough left to cover the cost of the 2 unpaid drive tiles.

If you have any questions, please let me know.

Thank you,

Joyce Dix
